

# 5 Ways Your Classroom Can Protect the Earth Every Day

## Start a Green Team

Share ideas and encourage others to reduce, reuse, and recycle!

## Assign Energy Ambassadors

Make sure that lights and technology are turned OFF when not in use!

## Set Aside a Share Table

You may not want it, but don't throw it away! Leave it on the Share Table for someone else.

## Plant Your Garden

Have fun and get messy while learning! What will you choose—flowers or veggies?

## Aim for Zero Waste

Paper isn't always necessary. Try classroom management systems, e-mail, and tools like Remind for communication instead.
